OVERVIEW
Below is the latest information on Vidant Health’s COVID-19 response and operational updates to help team members and providers safely fulfill our mission to improve the health and well-being of eastern North Carolina in the face of the pandemic.

Operations
PPE Comprehensive Guidance document
The Vidant Health PPE Taskforce is continuously working to keep team members and patients safe by reviewing and updating PPE guidelines, per CDC recommendations.

The taskforce has created a PPE Comprehensive Guidance document to provide information relevant for all team members, including those caring for rule out COVID-19 (PUI) and COVID-19 positive patients, as well as all patients.

Please review the PPE Comprehensive Guidance document and share it with your team(s). As new information becomes available, the document is regularly updated on the PPE MyVidant page.

Resources
All team members are encouraged to visit MyVidant.org or VidantHealth.com/COVID-19 for updates, which will include frequently asked questions. Click here to view current and previous alerts.
